***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The following is an examiner's statement of reasons for allowance: The closest prior art of record is Alden, U.S. patent application publication 2003/0072469. Alden discloses a network-based hardcopy mail scanning system to enable a mail recipient to view virtual images of their mail prior to physically receiving said mail. Unwanted mail from unknown origins can be discarded remotely by the mail recipient prior to actually receiving or touching the hardcopy mail. Thus the mail recipient is insulated from contact with potential letter bombs, biological agents, and chemical agents distributed by terrorists through the US or international postal systems. The process includes a means to digitize an image of hardcopy mail intended for a mail recipient, a database to store the digitized image, a scanning service computer connected to said database. Said scanning service computer and a mail recipient computer are interconnected by a computer network. The scanning service computer communicates images of hardcopy mail (addressed for delivery to the mail recipient) to the mail recipient computer via the computer network. The mail recipient can elect to accept mail for receipt or to reject mail which is then destroyed. By virtually selecting what mail to accept and discarding the rest, the recipient can discard mail from unknown origins prior to ever physically handling it.

In regards to claim 1, Alden taken either individually or in combination with other prior art or record fails to teach or suggest a data base that stores unique information contained in a postal indicia affixed to mail;

a plurality of recipient addressee units that reads and stores the unique information contained on the mail in the postal indicia after the mail has been delivered to the recipient; and

a data center that receives information stored by the data base and the recipient's units to identify the mailer to the recipient and assess the possibility of the presence of life-harming material in the mail.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
